## Standard Length Adjustable DogLeggs Full-length Adjustable DogLeggs

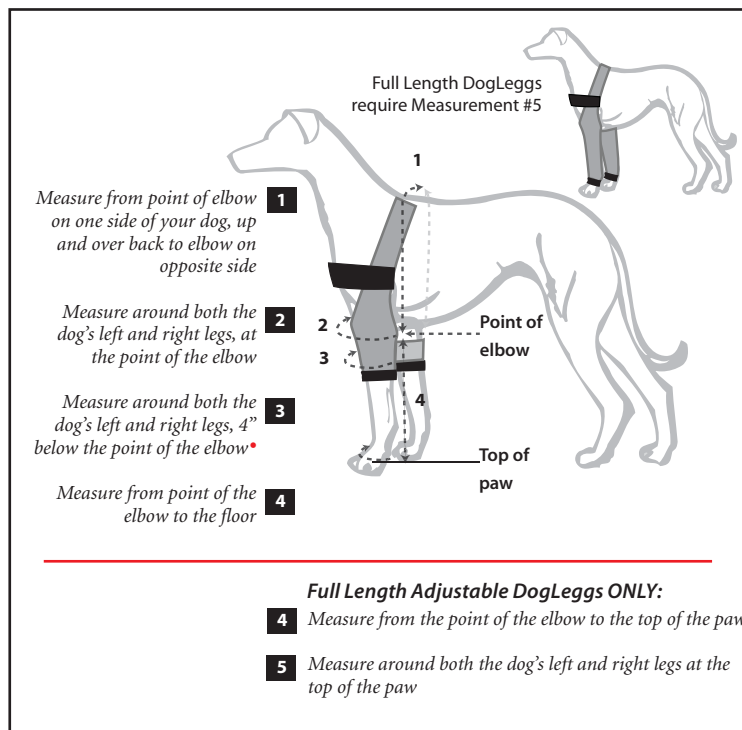

The soft coverage solution for sore elbows

Adjustable DogLeggs are recommended for:

- Hygromas – Adjustable DogLeggs treat the cause of the hygroma, not just the symptom
- Down dogs to prevent decubital ulcers and pressure wounds
- Dogs with hip dysplasia to protect the elbows from added stress
- Arthritis
- Elbow dysplasia
- Post surgical coverage
- Older dogs to help with pressure
- Neurologic dogs - to provide proprioception to the limbs
- Lick Granuloma

**\*Short/Small Dogs: Adapted Measurements**

3. Measure around both the dog's left and right legs half way between the point of the elbow and the top of the paw
4. Measure from point of elbow to the top of the paw

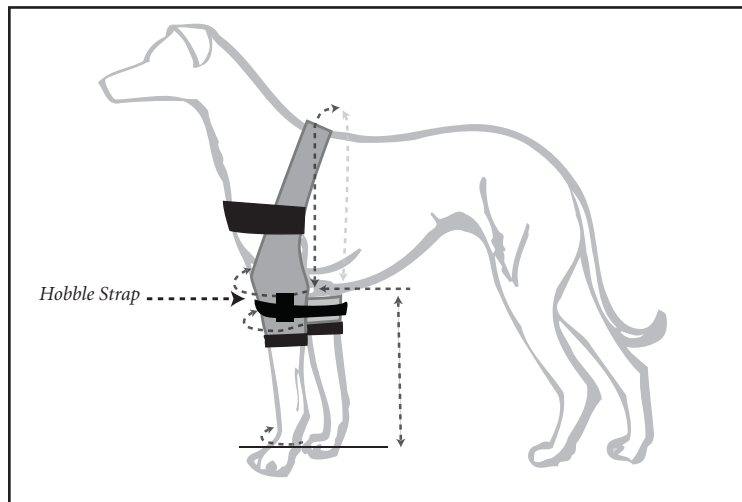

## Shoulder Stabilization System

The DogLeggs Shoulder Stabilization System limits abduction, flexion and extension of the shoulder, while allowing for full weight-bearing. The patient's gait is altered with a short limited stride. The DogLeggs Shoulder Stabilization System can be worn continuously for several months with minimal irritation. The device can be removed and reapplied easily for rehabilitation therapy and is simple enough for the patient's owner to manage. The typical use is for Medial Shoulder Instability (MSI), but it can be used anytime there is need to provide additional stability to the front legs.

The advantages of the DogLeggs' Shoulder Stabilization System are:

- No bandage irritation
- Can be worn for long periods
- Less muscle atrophy with the ability to provide rehabilitation with controlled use of the limb
- Requires less frequent bandage changes and adjustments
- Owners can adjust or remove and replace
- Easy removal for physical therapy
- Feasible to use with patients who live great distances from the clinic
- Available for dogs of all sizes

This product is available by prescription only.

### The Shoulder Stabilization Systems:

- 1 pr. Standard Length Adjustable DogLeggs
- 2 Hobble Straps, one for use, one extra
- 2 Hobble Tabs

Hobble Straps

Hobble Tabs

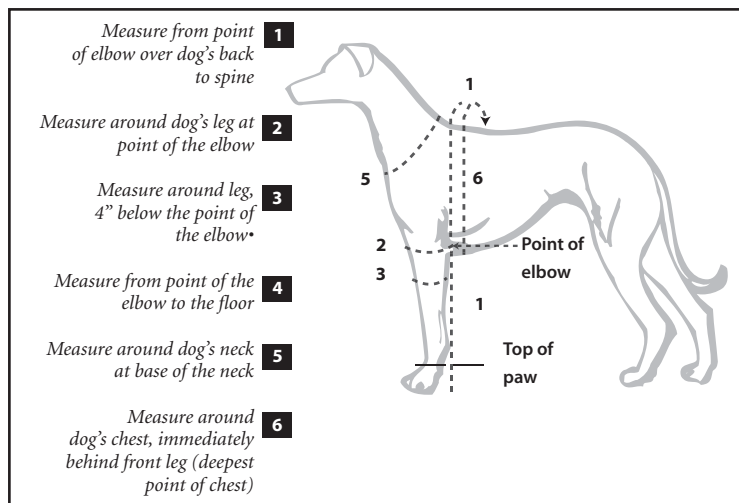

Standard Length Adjustable DogLeggs

All measurements are done with the animal standing

### DogLeggs for Amputees

The same protection provided by our Standard and Full Length Adjustable DogLeggs is available to forelimb amputees.

- The product protects the remaining elbow from the wear and tear of hard surfaces .
- This product involves a two-step process, with an initial prototype made using the measurements provided. The owner then uses the prototype to check the fit and provide additional positioning information for the final product version
- Price includes prototype fitting version and final DogLeggs for Amputee product
- Note: There will be two shipping fees for this product.

### Hock Sock

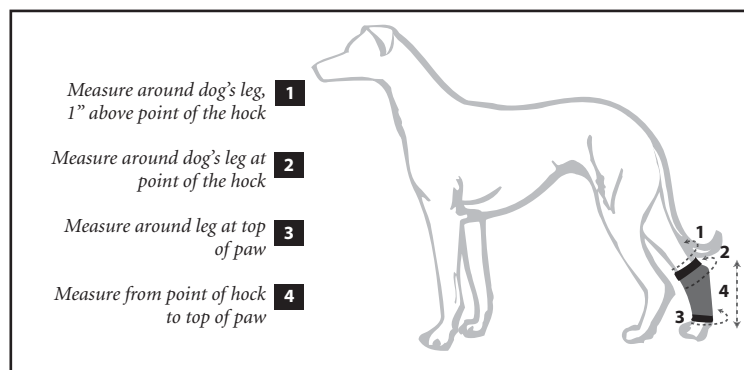

Coverage solution for the hock (lower joint on rear legs). There is no other coverage product for the hock that has the ability to stay on a dog and provide the necessary protection.

For protection of the hock area. The Hock Sock is not a brace, if the dog requires support, please see our Tarsal Support

Easily washable, stays on and in position.

Common uses for DogLeggs' Hock Sock are:

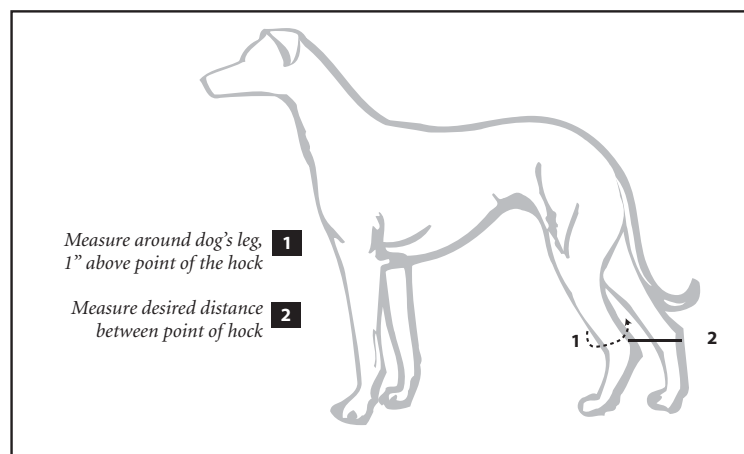

- decubital ulcers
- hygroma
- arthritis
- lick granulomas

### Rear Leg Hobbles

The DogLeggs Rear Leg Hobbles limit abduction, flexion and extension of the hip, while allowing for full weight-bearing. The patient's gait is altered with a short limited stride. The DogLeggs Rear Hobble is comprised of two cuffs of nylon-faced neoprene, with Velcro hook and loop closure for custom fit. The Hobble Strap passes through "D" rings on each Cuff. The hobble strap is adjustable.

Available by prescription only, ships only to the veterinary clinic

All measurements are done with the animal standing

800-313-1218 • 703-715-0300 • fax: 703-391-9333 • www.dogleggs.com

### Carpal Support

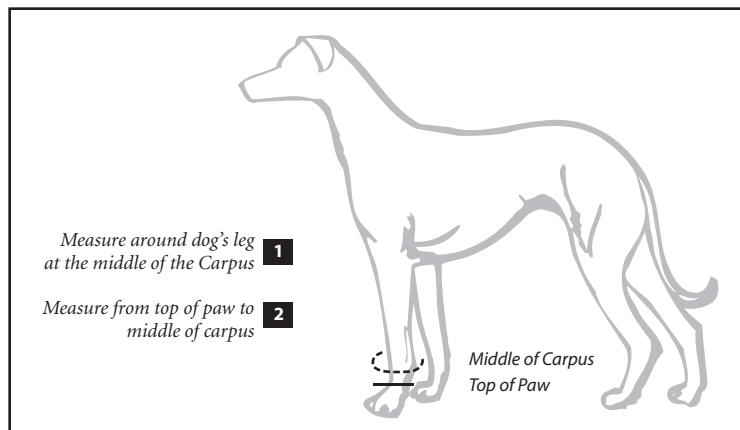

The DogLeggs' Carpal Support provides a stabilization solution for dogs of all sizes, due to joint weakness, arthritis or deformity. The DogLeggs' Carpal Support provides a light to medium level of support for the carpus (wrist).

Adjustable, comfortable. nylon faced neoprene with Velcro hook and loop closure for customized fit.

**Lined Carpal Support:** This version is recommended if the dog has Cushing's Disease, Addison's Disease, Auto-Immune issues, long term Prednisone therapy or extreme allergies.

**For firmer support:**

**OrthoPlast Splint Kit, available by prescription only and ships to the clinic only.**

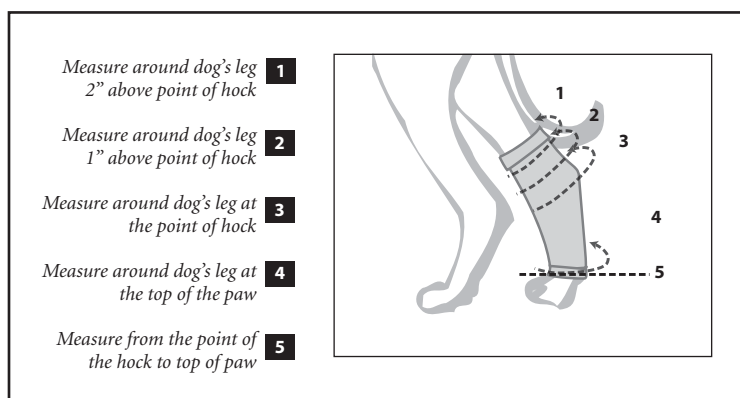

### Tarsal Support

The DogLeggs' Tarsal Support is similar to our Hock Sock, however, covers more of the leg, from approximately 3" above the point of the hock down to the top of paw.

The Tarsal Support is designed as a support versus, our Hock Sock is just a coverage solution. The Tarsal Support can be used either alone, or for further support, use our OrthoPlast Splinting Kit, that attaches to the outside of the Tarsal Support

**For firmer support:**

**OrthoPlast Splint Kit, available by prescription only and ships to the clinic only.**

### OrthoPlast Splinting Kit

The DogLeggs OrthoPlast Splinting Kit is designed to be used with either the DogLeggs' Carpal or Tarsal Supports to provide additional support and rigidity when the patient needs it as they are progressing through rehabilitation therapy or as a long-term option for patients who are not ideal surgical candidates.

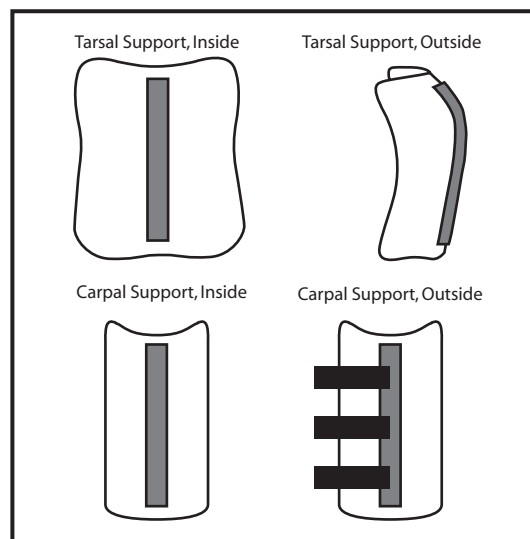

The DogLeggs OrthoPlast Splinting Kit may be purchased at the time the Carpal or Tarsal Support is ordered or at a later time, if it is determined firmer support is required.

OrthoPlast is a re-moldable plastic sheet that can be cut and molded after being heated with a heat gun, immersed in 160 degrees F (72 degrees C) water or in a small toaster oven.

**OrthoPlast Splint Kit includes :**

- 1 piece OrthoPlast
- 2 or 3 Stabilization straps (depending on size of Carpal or Tarsal Support)
- Velcro self-adhesive hook and loop for securing splint to the support.
- Complete instructions for shaping, molding and attaching the OrthoPlast to the Carpal Support or Tarsal Support

**Available by prescription only and ships only to the clinic.**

All measurements are done with the animal standing

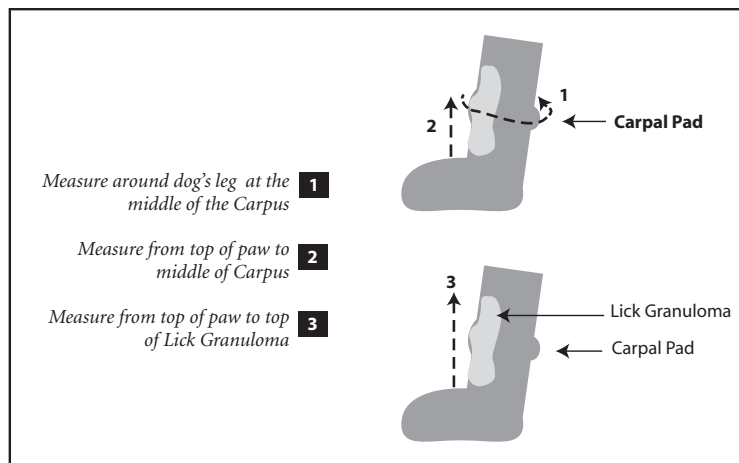

## Front Leg Wrap

DogLeggs' Front Leg Wraps have been designed specifically as a coverage solution for the lower front legs of dogs. The DogLeggs Front Leg Wraps are particularly effective as part of a solution for Acral Lick Granuloma, when used in conjunction with one or more behavioral, nutritional or pharmaceutical treatments.

The Wrap is not a Carpal Support or brace, it acts as a barrier to protect the effected area and allow for healing. The DogLeggs' Front Leg Wraps are constructed utilizing the same soothing materials as the DogLeggs' Hock Sock and is very well tolerated by almost all dogs.

These wraps will cover the leg from the top of the paw to approximately 1" above the lick granuloma for most patients. In very severe cases where the Acral Lick Granuloma extends high onto the front leg it may be necessary to use Full Length DogLeggs for treatments.

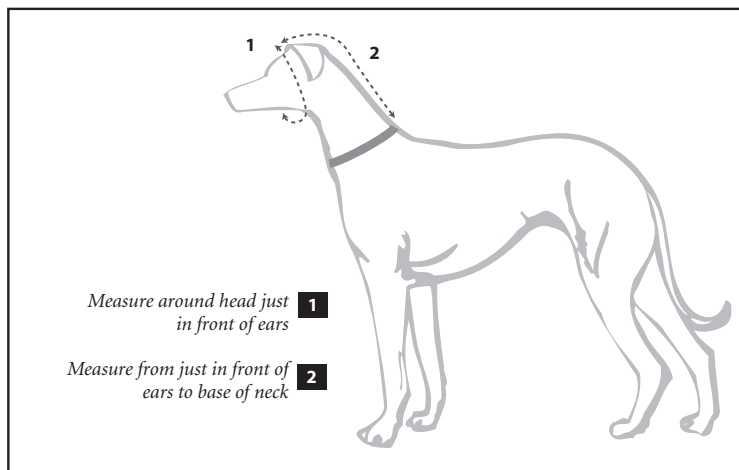

DogLeggs Front Leg Wraps are durable and machine washable.

## Swim Snood

DogLeggs Swim Snood is a product for dogs that are receiving aquatic therapy and are "head shakers". Some dogs are so bothered by water in and around their ears that they shake their heads violently and continually.

The DogLeggs' Swim Snood protects the ears and allows for a successful swim session. This product also has application as a head and ear covering during teeth cleaning and dental procedures.

## BuddyBags

**The perfect heat restorer for post operative, critical care and thermal therapy for physical rehabilitation.**

BuddyBags are the safe non-toxic way to provide heat with no risk of burns like many electric heating pads or risk of drawing heat away from the animal as it cools.

The rice core can be reheated over and over again and when necessary just replace the rice and continue using; also the outer cover and core liner are machine washable, making the BuddyBags very economical.

BuddyBags are so easy to use, just place it in a microwave to heat the rice core, hand shape it to support the body part in the desired position and let the long lasting heat do its work. The BuddyBag can also be placed in the freezer for cryotherapy to reduce swelling.

They also work great on DVMs and Vet Techs after a long day at work!

All measurements are done with the animal standing

## The DogLeggs' VEST Series

### The VEST for Holter Monitoring

**Consistent, dependable remote monitoring of patients, with comfort and ease of use.**

The VEST utilizes the latest generation of light weight, latex-free, adhesive free, breathable, antimicrobial, antibacterial, bactericidal "fabric."

Patient monitor attaches directly to the TheVEST. The Stabilization Strap guarantees equipment is protected from being dislodged during use.

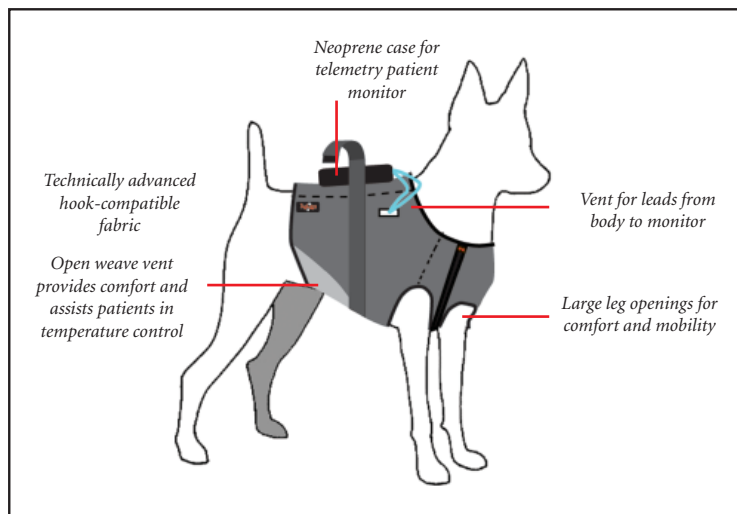

Care: Machine wash gentle, in lukewarm water with mild detergent, air dry.

Sizes: XXS, XS, S, M, M/L, L, XL, XXL

Custom sizes available upon request

#### VEST Sizing Information: (chest measurement)

XSmall.....	15-18"	M/L.....	30-34"
Small.....	20-24"	Large.....	34-38"
S/M.....	24-28"	XLarge.....	38-44"
Medium.....	26-30"	XXL.....	44-52"

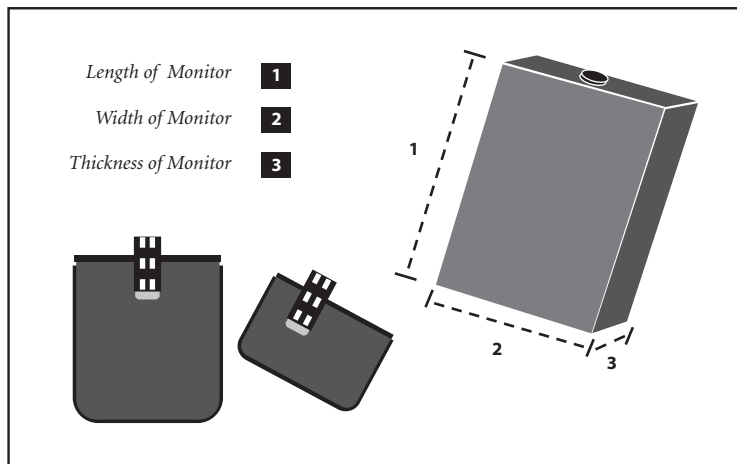

#### Remote Telemetry Device Case

Used in conjunction with the VEST, allows user to attach remote telemetry monitor directly to the patient, comfortably and securely. The case protects the device from damage while being worn by patient.

Information we will need to produce the case for your monitor:

- Monitor manufacturer
- Monitor model number
- To which side do the leads attach and where, long side or short side?
- Measurements of your monitor

### The VEST for Ehmer Sling

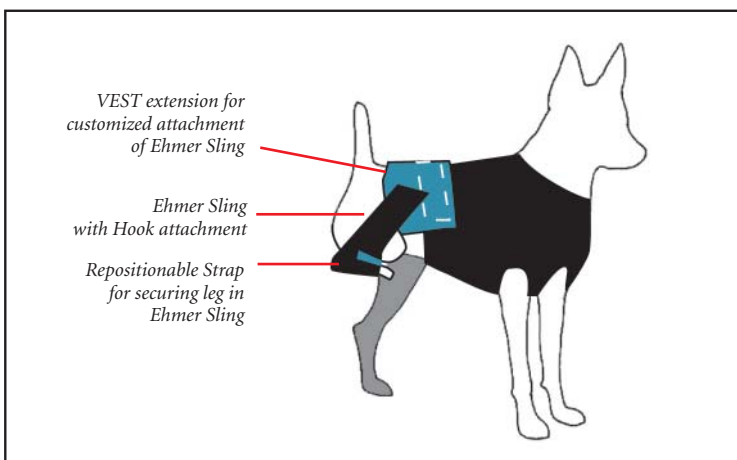

Ehmer Style Sling works for both left and right legs. The Sling attaches directly to TheVEST, one strap under the belly and one on the same side as the leg to be restricted.

Because there are such a wide variety of sizes and shapes of dogs who will wear the same size VEST, we can provide an extension that attaches directly to the VEST and allows for longer backed dogs and customized placement of the Ehmer Sling.

If the dog does not fit into one of our standard size VESTs, custom-sized VESTs are also available.

The VEST and Ehmer Sling are machine washable and very durable

Available by prescription ONLY and ships only to the clinic

All measurements are done with the animal standing

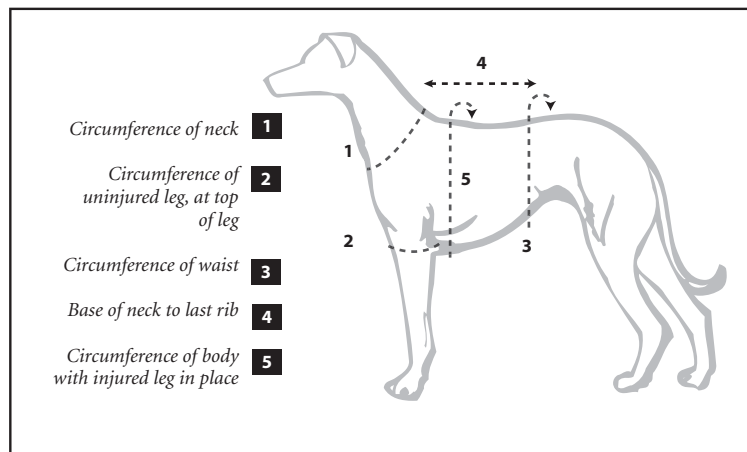

### DogLeggs' Velpeau Sling

A Velpeau sling is a method of holding the wrist (carpus), elbow and shoulder joints in flexion, preventing the animal from putting any weight on the forelimb. The DogLeggs Velpeau Sling VEST is easy to use and securely immobilizes the limb. Using the DogLeggs Velpeau will result in better outcomes and owner compliance by:

- eliminating the need for owners to try and rewrap using traditional methods
- Waiting until their next re-bandaging appointment when traditional methods come lose
- Owners just giving up and the patient's limb not getting the rest it needs

The DogLeggs Velpeau Sling VEST is manufactured utilizing hi-tech, hook compatible, anti-microbial, antibacterial, bactericidal, three dimensional, breathable fabric. The Velpeau Sling is machine washable.

By prescription only, ship only to the veterinary clinic.

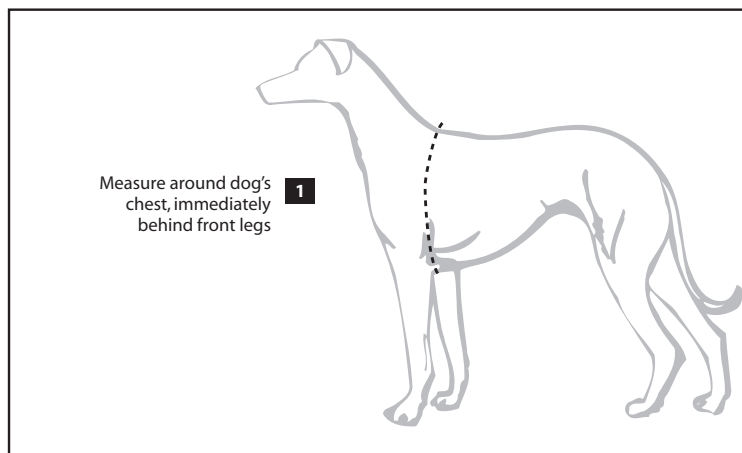

The DogLeggs' Velpeau Sling VEST is available for both left and right legs.

### Surgi-Sox - Animal Bandage Systems

The Surgi-Sox™ line of products from DogLeggs provides protection, comfort and support for pets. The Surgi-Sox Torso and Surgi-Sox Leggings are compression bandaging solutions to cover wounds, stitches, abrasions and skin conditions. Made of a unique fabric produced just for DogLeggs, it is designed to not stick to wounds and its anti-bacterial and anti-microbial properties are literally woven in, to help prevent infection. This special material breathes and wicks away moisture, promoting faster healing, while its 4-way stretch provides optimal compression for support, control of swelling or for use as an anti-anxiety wrap.

The Surgi-Sox Pet-Lift™ is made of the same material as the Torso and Leggings and adds a set of soft straps to safely and comfortably lift an animal. The Pet-Lift is the perfect solution for animals that need a helping lift while rehabilitating from surgery, trauma or animals with dysplasia, arthritis or neuropathy. The Velcro hook and loop closure along the back makes it easy to put on, while the comfortable breathable fabric allows it to be worn all day. US Patent # 6070557, 6431123, 6595162

2XL-B and 2XL-D designate the size for a deep chested and narrow waisted dog, such as a Boxer or Doberman
