

# Carpal Support

## Carpal support can be challenging.

Proper fit and function rely on a product that will consider the barrel shape and the bony prominences of the carpus. The DogLeggs Carpal Support is not just a simple cylinder, it is barrel-shaped, like the carpus. It is made to the specific measurements of the patient and the material conforms to the limb, which allows for an intimate fit. Its unique shape, intimate fit and the material's conforming properties provide even pressure and support from top to bottom, reducing the risk of rub sores. The DogLeggs Carpal Support provides mild to moderate support. For additional support, one or more Extra Stabilization Straps may be added. If rigid support is needed, OrthoPlast may be molded and applied to the DogLeggs Carpal Support.

## Indications for Use:

-  Carpal hyperextension (mild to moderate)
-  Carpal instability/sprain or strain Injury
-  Carpal osteoarthritis
-  Immune-mediated joint disease
-  Post-operative management of carpal arthrodesis or avulsion fractures

## Specifications:

The DogLeggs Carpal Support is made from closed cell foam with synthetic rubber material and laminated with nylon jersey fabric. Closes with VELCRO® Brand fasteners. It is light-weight yet durable and has incredible tensile strength. The product is machine washable.

## How to measure:

The Carpal Support is custom-sized to the measurements you provide. For accurate measurements, perform all measurements with your pet standing and use a dressmaker's flexible cloth or vinyl tape measure. Measure with enough tautness to dent the fur but not the skin.

- 1 Measure around dog's leg at the middle of the carpus.
- 2 Measure from the top of the paw to the middle of the carpus.
- 3 Measure from the top of the paw to the point of the elbow.

Size	Circumference	Height	SKU#
